Quotation for Mobile App Development (MVP)

Prepared By: Ranga

Date: May 23, 2025

Project Scope

Development of a cross-platform mobile app (Android + iOS) using React Native. The app will include class booking logic, dynamic video playback integration, secure user authentication, and real-time dashboard interactions, all styled with mobile-optimized navigation and transitions.

Technical Feature Breakdown

Class Booking Module

- Class listing with dynamic filtering (type, trainer, time)

- Booking logic with API integration

- Reusable card components for class UI

Workout Video Gallery

- Lazy-loaded video thumbnails with category filters

- Fullscreen playback using Expo AV module

- Video metadata management with local or remote assets

User Dashboard

- Context-aware user state display

- Upcoming bookings and workout history

- Optional charts/stats using React Native SVG or Victory

Authentication

- Secure login/signup flow with JWT or Firebase

- Route protection via navigation guards

- Form validation and session persistence

Mobile UI/UX + Navigation

- Bottom tab + stack navigation using React Navigation

- Platform-consistent UI with Touchable + GestureHandler

- Smooth transitions and theming via Tailwind RN or Styled Components

Total Estimated Cost

INR 47,000
